DISCONTINUED PLATFORMS. PLAN THE MOVE BEFORE A FAILURE DOES.

Migrate your SLC 500 & PLC-5.

To CompactLogix or ControlLogix, with minimal rewiring.

PLC-5 and SLC 500 processors are discontinued, and spare parts are scarce and expensive. We plan the move around your production, not around a breakdown.

- **Since 2004: 22 years in business**
- **Our own union electricians**
- **3,500+ jobs completed**

START HERE

Free

Assessment, on-site or remote.

- Inventory of processors, I/O and HMIs
- Program review, issues flagged
- Phased migration plan
- Fixed-price quote, no obligation

Remote: email us your program and photos

UPGRADE PATHS

Upgrade at the pace your plant needs.

- **Phased** one line at a time
- **1492 kits,** field wiring stays put
- **DH+, RIO and PanelView** updated
- **Shop-tested,** cut over at shutdown

Fixed price once the scope is set

On a MicroLogix? Micro800 upgrades start at $1,995.
On Siemens or another brand? We convert to Logix.

Free assessment for any platform

1. **Send your program and photos,** or we come to you
2. **We assess and quote** a fixed price at no cost
3. **We convert, test and cut over** during your shutdown

Free assessments are no-obligation. On-site assessments are available in our Midwest service area; remote assessments anywhere in the U.S. Quotes are fixed-price for the scope assessed. Conversion kit availability depends on your existing modules and is confirmed in the quote. Our phased plans don't rely on the 1747-AENTR adapter, which Rockwell discontinues in February 2027.
